

I completely agree with the comments that the American Radio Relay League has submitted relating to Docket ET 03-104. I DO NOT think proponents of BPL have investigated this with any kind of unbiased scientific research. Extensive and independent research needs to be done to insure that NO interference to ANY radio spectrum transmission occurs. Approval of ET 03-104 before solid proof of no interference what so ever to other radio spectrum services, in my opinion, would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public you are sworn to serve and protect.
